Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 172-174 and 176-177 are pending.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 172, drawn to a method of feeding an animal comprising feeding the animal a corn grain from a plant transformed with a nucleic acid to suppress expression of a corn delta-9 stearoyl ACP desaturase, classified in class 426, subclass 2.
 - II. Claim 173 and 177, drawn to a method of feeding an animal comprising feeding the animal a corn grain from a plant transformed with a nucleic acid to suppress expression of a corn delta-12 desaturase, classified in class 426, subclass 2.
 - III. Claim 174 and 176, drawn to a method of feeding an animal comprising feeding the animal a corn grain from a plant transformed with a nucleic acid to suppress expression of a corn delta-9 stearoyl ACP desaturase and a corn delta-12 desaturase, classified in class 426, subclass 2.
2. Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are each distinct methods that require different components and result in different products, wherein the suppression of expression of either one of a corn delta-9 stearoyl ACP desaturase and a corn delta-12 desaturase, or the suppression of both of these enzymes would each result in corn grain having different genetic and biochemical properties.

Art Unit: 1638

Thus, the claimed inventions are capable of being separately made, independently used, and the patentability of one would not render the others obvious or unpatentable.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by the requirement for different searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth F. McElwain whose telephone number is (571) 272-0802. The examiner can normally be reached on increased flex time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson can be reached on (571) 272-0804. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
